

ORIGINAL EQUIPMENT MANUFACTURERS OF

Jatayu
Super

India's first Vacuum Operated
Garbage Suction machines

WE ARE REVOLUTIONIZING THE FUTURE OF WASTE MANAGEMENT

Spruce Up Industries is the inventor, manufacturer, pioneer and source supplier of the Jatayu™ range of machines

Our machines are individually designed to employ the most advanced technologies of the world and to simultaneously suit the unique requirements and challenges that India presents.

- » **250+ machines sold in over 22 states**
- » **Carefully tuned for Indian conditions**
- » **Built on a proprietary unique platform with patented technology**

Our mission to create affordable and accessible Earth Cleaning Machines which will empower communities across the world to bring about positive environmental change for themselves by themselves.

JATAYU SUPER

- Capable of collecting coconuts, glass bottles, shoes, food waste, etc
- Patent pending Hydraulic boom with expandable reach to overcome cars and obstacles
- Compact enough for quick waste collection and to address citizen complaints instantaneously

The Jatayu Super series is a full-fledged package for mid-sized heavy-duty vacuum.

The Super series is capable of reaching a 20 ft. distance with the help of a three-axis hydraulically controlled telescopic boom arm. A hydraulically adjustable 1.5 m³ Aluminum Hopper container is efficient in dumping the waste from a height of 6 ft.

Collects up to 2500Kgs of waste per shift

JATAYU Super empowers the user to simultaneously clean and store large amounts of dust, garbage, or waste.

JATAYU HD

The Original Jatayu. Industry-leading vacuum in a compact package

Designed to tackle the challenges of the narrowest of streets and the densest of environments, the design philosophy behind the HD was to create the most powerful vacuum in the smallest footprint possible, bar none.

Due to the modular machine design, users have the flexibility to mount it on the trailer or on the small truck, or on the cart.

Collects up to 500Kgs of waste per shift

- An economical option of JATAYU machines
- Scalable and customizable storage capacity
- Low maintenance

WHY JATAYU SUPER

A telescopic multi-axis 270 ° covering boom enriches the user's experience, and can easily cross the obstructions such as walls, fences, parked cars, embankments and so on.

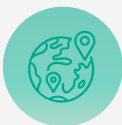

JATAYU Super comes with a hydraulic tipping container makes the unloading of the garbage seamless. In other words, all the heavy-duty work will be performed without human interference.

JATAYU Super has a large storage capacity as it is equipped with a hydraulically adjustable 1.5 m3 Aluminum Hopper container which has a load-bearing capacity of ONE ton.
